

# WoodCreek Window Coverings

## *Designed for Easy Care and Cleaning*

All **WoodCreek Window Coverings** are made for a lifetime of wear-resistant, trouble-free performance. Cleaning your WoodCreek blinds and shutters is simple and should be done on a regular basis. The following recommended cleaning methods have been outlined by product category for your use.

### General Care and Cleaning Helpful Hints

- **Dusting.** Regular light dusting maintains a like-new appearance of most blinds and shutters.
- **Vacuuming.** For deeper cleaning, vacuum gently with the **brush attachment** of any vacuum cleaner.

### WoodCreek Faux Wood Blinds and Composite Shutters

- The best method of cleaning is to regularly use a clean, dry feather duster, cleaning cloth or brush attachment of a vacuum cleaner to remove and dust or debris.
- To assure thorough cleaning, open the shutter louvers or blind slats so that both sides can be cleaned. Then tilt the louvers or slats upward until closed and proceed to dust. Repeat the process with the louvers or slats tilted down.
- **Do not use abrasive cleaners or chemical solvents, as they will scratch or damage the surface.**

### WoodCreek Custom Wood Blinds and Shutters

- Clean using a dry and soft feather duster, clean cloth or dust cloth. A vacuum with the soft brush attachment can also be utilized.
- Ultrasonic cleaning or use of chemical solvents and scrubbing cleansers are not recommended. They will damage the product.
- Protect all fine wood blinds and shutters from exposure to steam or high moisture areas, rain or outside irrigation systems to ensure their long life.
- To assure thorough cleaning, open the shutter louvers or blind slats so that both sides can be cleaned. Then tilt the louvers or slats upward until closed and proceed to dust. Repeat the process with the louvers or slats tilted down.
- Like any fine wood finishing, stained shutters should be treated periodically with lemon oil or other wood preservative product to protect their finish and enhance their luster.
- When cleaning any window, spray glass cleaner on a cloth rather than spraying directly on the window. This will prevent damage to the wood finish by splattering cleaner.

With proper care and maintenance, your investment will provide you with years of elegance and beauty for your home.
